

## Mobile Energy Units

Hire | Sale | Lease

We deliver energy where it's needed.

## MOBILE HEATING UNITS

Our heating units are high-quality, high-performance mobile energy sources. With an output from 40 to 2,500 kW, they provide a reliable supply of heating energy, process and hot water for days, weeks and months.

HOTMOBIL offers trailer and container-mounted mobile heating units, as well as mobile heating solutions for events, etc. These heating units are used as emergency or temporary heating solutions in the event of scheduled maintenance, refits or a heating system failure and provide mobile heating solutions for quick and flexible application. The innovative, ready-to-connect heating units with integrated heating oil tank are available in different performance categories, depending on the available space.

## MOBILE CHILLER UNITS

Our air-conditioning and chiller units have an output ranging from 4 to 1,200 kW.

Our mobile split air conditioners consist of an indoor unit and a heat exchanger for outdoor installation. The compact small units also ensure a comfortable temperature on hot days, for example, in the industrial, domestic and event sectors.

The environmentally friendly air and water-cooled units are suitable for a wide range of application areas – from simple cooling and air-conditioning applications to demanding industrial and process cooling systems. Flexible hoses connect the powerful and ready-to-use water chillers directly to your system.

We deliver as much energy as you need.

## MOBILE STEAM UNITS

Our state-of-the-art steam/hot-water units have a boiler and components made by well-known manufacturers. They are available with an output of up to 16,000 kg/h. We guarantee reliable and environmentally friendly operation. Our mobile steam units are ready-to-use, stand-alone steam units. The steam units with integrated water treatment system are available on a tandem trailer for mobile use.

The powerful mobile steam unit with steam and hot-water boiler is a containerised system. The unit is equipped with a water service module, Testomat support, water sample cooler and automatic chemical dosage.

## MOBILE ELECTRIC UNITS

Our small, high-quality and high-performance HOTBOY electric boilers with an output of up to 9 – 36 kW are particularly suitable for use in family homes. The mobile electric boiler is connected to the building's heating system in no time at all. These boilers are ideal in the event of heating system failure, scheduled maintenance, frost damage, construction drying, when installing underfloor heating and as emergency heating, even in compact spaces. Thanks to their compact construction and ease of operation, they are the ideal and reliable tool for the workman. HOTBOY is available to hire or purchase.

We set new standards – innovative advantages for you.

## MOBILE BIOMASS UNITS

In addition to conventional energy sources such as gas and oil, HOTMOBIL, the specialist for innovative mobile energy, also offers mobile heating units fuelled by renewable energies. Not only is this environmentally friendly but it is also ideal for ecological use in areas where fossil fuels cannot be used.

Mobile pellet heating units are available as portable, compact heating units with integrated pellet silo and as containerised systems with variable pellet stocks for temporary heating solutions – for the sake of the environment.

## ENERGY GUARANTEES

Whether you require heating, cooling or steam energy, we offer you permanent protection against the risks posed by the failure of your energy supply system. The energy guarantees from HOTMOBIL provide comprehensive back-up. Our many years of experience in planning and developing mobile energy solutions have shown us that many of our customers want much more than just mobile energy in the conventional sense. They want protection against unpredictable energy system failure. This is why HOTMOBIL developed the energy guarantee. A single policy protects you against the consequences of the failure of your stationary system. In the event of a fault, we'll provide you with your own individual emergency energy unit – so you can count on us wherever you are in Germany.

The specialist for innovative mobile energy.

## ENERGY IN MOTION

Hotmobil Deutschland GmbH, with its headquarters in Germany, is one of the leading service providers in the field of mobile energy in Europe. We specialise in planning, manufacturing, leasing and selling mobile energy units. The company was founded in 1994 and is one of the first European manufacturers to specialise in the industrial production of heating units. With its pioneering spirit and innovative strength, Hotmobil Deutschland GmbH sets new standards in the industry. Today, the company has a significant market share in the field of mobile energy supply.

With a network of branches and service operations throughout Germany, HOTMOBIL is ideally placed to offer impressive expertise and customer proximity. We operate at national level with a strong local presence!

Designated partner companies reliably ensure HOTMOBIL services in neighbouring countries.

Thanks to its many years of experience in the professional treatment of scheduled renovation work and in the event of unexpected failures in the supply of heat, cooling energy and steam, the company enjoys the trust of its customers and market partners. Great reliability and our commitment to customer service guarantee rapid and competent on-site assistance. As a forward-looking company, Hotmobil Deutschland GmbH invests in cooperation-based partnerships with employees, suppliers and customers. In 2009, we were granted certification of conformity with DIN EN ISO 9001:2008 by the national certification body TÜV-Süd. This confirms our cutting-edge technology, our optimum production and manufacturing methods, both in ecological and economic terms, as well as our highly efficient customer service.

Hotmobil Deutschland GmbH is a 100 % subsidiary of Mainova EnergieDienste GmbH based in Frankfurt.
